

## Vacuum cleaners for dry pick up

No dirt deter them: nilco commercial cleaners for dry pick up. Robust, mobile and versatile. These vacuum cleaners are designed for widely varying demands and manifold applications. nilco machinery follows a long-standing tradition of excellence grown from experience. Our business is based on continuity. nilco products are built to last, and we believe that you should be able to get spare parts and cost-effective repair services even years after your original purchase.

S 20 L

**Electric suction brush**  
28 cm, 30 watt  
Ref. No. 22 15 810

**Electric suction brush**  
36 cm, 200 watt  
Ref. No. 22 15 910

**Hard floor nozzle**  
with soft bristles  
Ref. No. 27 24 880

**Turbo suction brush**  
driven by air flow  
Ref. No. 27 25 820

## DRY TUB VACUUM CLEANER S 20 L

**Successful, very powerful and sturdy vacuum cleaner for the professional use with particularly high endurance, high filter quality, noise-reduced motor, large operating radius and a large number of standard and optional accessories.**

Noise-reduced motor head with practical one-hand locking/unlocking mechanism. Three-filter technique: 2-ply paper dust bag, permanent textile fine dust filter and motor protection filter. For fine dust removal and anti-allergy vacuuming for highest requirements, a HEPA-filter (filter class H12) is optionally available. The motor head is equipped with an utensil socket for connecting an electric suction brush with integrated overload protection.

The plastic canister is acid- and alkali-proof with a volume of 8 liters equivalent to over 1 kg of dust. The three-point wheel base offers optimised multi-directional mobility. The vacuum cleaner comes with a 12.5 m power cable and extra-long suction hose (2.5 m) as standard, maximising the operating radius to approx. 15 m. A self-service feature allows for quick and easy power cable exchange by the user without the need to visit a workshop! One crosshead screw protects the power cable against excessive tractive forces in everyday operation.

The appliance is delivered with a large number of high-quality accessories as standard equipment (nominal width 35 mm).

### Technical basic data

- 1,200 watt
- Power cable 12.5 m
- Suction hose 2.5 m
- Particularly sturdy and practical one-hand locking mechanism
- Integrated socket for electric suction brush
- Exchange of power cable without work shop assistance

### Standard equipment

- 2 suction tubes, black-painted
- Suction hose with handle and suction control, 2.5 m
- nilco switch over floor suction nozzle 30 cm, upholstery nozzle with bristle strips and thread pick up, swivelling furniture brush, crevice nozzle and 1 paper dust bag

### Optional accessories

- HEPA-filter H12 for highest requirements
- 2 electric suction brushes (28 and 36 cm)
- 2 turbo suction brushes (12 and 28 cm)
